

CORPORATE MISSION STATEMENT

The **Flexyfit Academy** (Flexyfit Plus GmbH) is a non-university educational institution that has set itself the goal of offering comprehensive training and further education programs. In addition to a sound technical education, the educational content is also intended to introduce students to the real world of work.

We are particularly committed to three requirements:

1 Practical orientation

The participants in our training courses learn in a very practice-oriented way what their future field of employment looks like. Communication is always kept open through constant feedback from both sides. Our trainers are constantly striving to respond to each individual personality in a differentiated and individual way. This almost guarantees maximum training success.

2 Quality orientation

The Flexyfit Academy strives to meet the requirements of several quality seals. As a result, our organization guarantees a high level of quality in the content of its training courses. Our participants are individually challenged AND supported. Our graduates are our flagship and it is therefore more important to us to certify quality than quantity.

3 Market orientation

The Flexyfit Academy offers are strongly ori-

ented towards the current market situation, its supply and demand. This enables our graduates to gain an immediate foothold in the industry, whether on a fee basis or as a part-time or full-time employee.
